## IDENTITY PROTECTION

Protecting yourself from identity theft and credit card fraud

In the modern world, almost everyone holds a credit card. Reportedly, 7 in 10 American's have at least one credit card and there are 364 million open credit card accounts in the U.S. as of November 2018.

The reach and popularity of credit cards have made it a major target of fraudsters out there. Many fraud schemes target credit cards, such as skimming (copying the credit card details electronically and duplicating the

card), card theft, identity theft, phishing, vishing (voice phishing), card not present fraud, etc.

Read more on how to protect yourself from fraud schemes.
